IBM, Online
Nov 2023 - Jan 2024
Data exploration and visualization with R has its own features on performing various tasks that helps the user to forecast the outcome in smoother way.
Data visualisation helps in exploring the data set in a easier manner and to get the insights in the simplest way.

PROJECTS

Plant disease detection

Nov 2023 - Dec 2023

<https://github.com/appireddy2601/plants.git>

Plant disease detection is a idea in which the affected plant image will be uploaded by using CNN the model predicts the disease that affected the plant .

I have developed this using Deep learning,CNN and streamlit.

At Your Service

Jun 2022 - Nov 2022

At Your Service is a idea in which the customers are connected to the nearest authorised service centre because of busy schedule of people and repair/servicing the product at the service centre
